ORGANIZATIONAL PLANNING AND CAPACITY BUILDING GIVE THE WORLD A MORE SUSTAINABLE FUTURE

We offer comprehensive assistance to organizations, corporations, and governments in developing in-scope long-term strategies and short-term objectives that are achievable within their sphere of influence.

When it comes to developing thorough, detailed, and time-bound action plans, regarding Human resources development, Organizational development and Institutional framework development our clients may count on the aid of our organization.

LEGAL AND CONTRACTING: GIVE THE WORLD A MORE SUSTAINABLE FUTURE

Through the entirety of the project lifecycle, our legal and contract management scope of services is maintained to guarantee the on-going delivery of business and operational objectives necessitated by the contract.

WHO WE ARE:

THE WHOLE PICTURE

Kenana Engineering & Technical Services (KETS) is a professional engineering services provider that has been in business for more than three decades, the firm has an invaluable role in hundreds of projects worldwide.

KETS is a progressive firm, offering various services across a wide range of industries. In KETS we choose to follow the best practices in the industry to provide enabled services in Sudan and the region.

Our firm was profoundly shaped by the constant drive to exceed the customer demands and expectations, resulting in a cultivated relationship with all stakeholders, enabling us to surpass the beliefs and objectives of the company and its partners.

WHAT WE DO

The opportunity window was wide open for us to seize valuable chances at the national and international levels as the vast accumulation of knowledge and experience is considered a potent legacy asset that is a pillar of all KETS projects.

Our firm was profoundly shaped by the constant drive to exceed the customer demands and expectations, resulting in a cultivated relationship with all stakeholders, enabling us to surpass the beliefs and objectives of the company and its partners.

This level of success has indeed helped deepen our understanding of the nuances and differences in the fields to assess providing customised and flexible solutions tailored to each project requirements, which has constantly refined and strengthened our relationships with our partners on both local and global levels.

At KETS we ensure to provide innovative, environmentally conscious, and ecologically sound solutions to preserve and enhance environments in aims of an elevated quality of life.

Today, we grew into an engineering powerhouse that can confidently fulfil and exceed all engineering needs in Africa and beyond.

Our services stream through various integrated verticals

BUSINESS DEVELOPMENT: GIVE THE WORLD A MORE SUSTAINABLE FUTURE

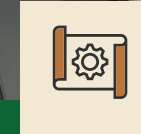

The accumulated knowledge and excellence grasp of dataset in the fields have enhanced the urge to excel in the domain of Business Development. Starting with concept development, BD services also include conducting thorough baseline surveys, bankable feasibility studies and fund availing in aims to deploy each strategy using the suitable technology to benefit from all available resource.

ENGINEERING AND PROJECT MANAGEMENT: SUCCESSFUL PROJECT DELIVERY

The researches and development studies have allowed us to compete with ourself in various distinct levels across the region, as it played the role of the cornerstone in prior execution detection, rehabilitation & expansions, construction supervision & commissioning performance, enhancing production and operational effectiveness, diagnosing and fixing scope issues, closing and handover.

The depth and breadth of our services and expertise allow us to work closely with clients from the earliest stages of a project all the way through to its completion and beyond.

CONSULTING: GIVE THE WORLD A MORE SUSTAINABLE FUTURE

Our project management consulting services are adaptable enough to handle anything from micro- to mega-projects. Our track record demonstrates that we can complete tasks for clients despite the complexity of their situations, taking into account all environmental and technological factors while working under tight deadlines and at off-the-beaten-path locations.

Our familiarity with international contractors and their expertise comes from years of managing large-scale projects. Because of this, we are in the ideal position to bring your project's elements together.

WATER TREATMENT, TECHNOLOGIES' FIRST GIVE THE WORLD A MORE SUSTAINABLE FUTURE

Following the World Health Organization (WHO) standards, together with Kenana Sugar Co.Ltd (KSC), KETS has developed water treatment technology which has raised the bar in the region regarding supplying clean water to the environment. Our technology is addressed as a patent under the two companies' names.

The WTP technology is developed primarily for river watercourses, its application is compatible with the available resource in each location, and is tailored to each project needs.
